PROFESSIONAL SUMMARY

Immersive technology developer with extensive expertise developing AR/VR applications, spatial computing, and delivering XR training. Created and implemented location-based AR solutions, VR teleoperation systems, and interactive prototypes using Unity, ROS, and WebXR. Founded and expanded an AR/VR agency, held countrywide workshops for over 5,000 people, and provided over 150 hours of XR training to government workers. Recognized for research contributions and Meta-certified as a Spark AR Creator. Currently pursuing an MSc in Immersive Technology at the University of Bristol.

CORE COMPETENCIES

Unity 3D • Unreal Engine • AR Foundation • Lens Studio • WebXR • Blender • C# • Effect House • JavaScript • ROS Integration • gRPC • 3D Modelling • Immersive UI/UX • Mobile AR/VR Development • Spatial Computing • Location-Based AR • Mapbox • VR Teleoperation • Hardware Interfacing • Prototype Testing • Version Control (Git) • Agile Development • Remote Collaboration • Technical Training • Cross-Platform Deployment

PROFESSIONAL EXPERIENCE

Intern | Kinisi Robotics, Bristol, UK | March 2025 – Present

- Connected Unity with Robot Operating System (ROS) via a gRPC server to build a VR teleoperation interface, enabling low-latency communication between simulation and robotic hardware.
- Configured real-time VR control schemes and conducted iterative testing, resulting in a functional prototype for immersive robotic manipulation.

Founder | Visioment Studios, Shrirampur, India | February 2024 – April 2025

- Launched an AR/VR agency that delivered 20+ client projects and generated ₹1.5 million in revenue through direct outreach and custom development services.
- Led a 5-person team and managed all phases of project delivery for education, real estate, and retail clients, ensuring on-time and in-scope deployment.

XR Instructor | CDAC India, Pune, India | July 2024 – September 2024

- Taught over 150 hours of hands-on XR development to 200+ government professionals, covering Unity, 3D interaction, and immersive simulations.
- Created a structured curriculum and guided learners in building functional XR prototypes aligned with public sector applications.

XR Developer (Remote) | Wallspace, California, USA | August 2023 – August 2024

- Developed an AR application using Unity, Mapbox, and AR Foundation to deliver geolocation-based virtual content for real-world urban use.
- Collaborated with international teams across time zones to plan, build, and test a scalable prototype with dynamic, location-aware features.

AR Developer Intern | IQ TechMax, Inc., Chennai, India | February 2023 – May 2023

- Built AR applications and filters for mobile platforms using Unity and Spark AR, integrating 2D/3D assets, gestures, and animations.
- Worked with designers to optimize visual quality and performance across Android and iOS, ensuring consistency and usability.

EDUCATION

University of Bristol, Bristol, United Kingdom

- MSc in Immersive Technology (VR and AR) | 2024 – Present
- Research Project: WebGPU Immersive Web Tool

Sanjivani College of Engineering, Kopargaon, India

- B. Tech in Mechatronics | CGPA: 8.34 / 10 | 2021 - 2024
- Capstone Project: 3D Printer AR Digital Twin

ACHIEVEMENTS

- 2nd Runner Up, Augg.io Summer Hackathon.
- 1st Runner-Up, Best Paper Award – 7th PI-CET (2025), Parul University (with The IET)
- Best Paper Award – ICRTC 2023, 2nd International Conference on Recent Trends in Computing
- Meta Spark AR Creator – Certified for advanced AR development using Spark AR
- Meta Spark AR Campus Ambassador – Trained 5,000+ participants via online workshops
- Top 1% AR/VR Voice on LinkedIn – Recognised for content and engagement in immersive tech
